

3 Tips for AI Code Review That Doesn't Suck

How to make AI code review actually useful?

#1

Keep MRs Small for AI Code Review

If you want the AI code review to be useful, make sure that you're reviewing small parts of the code.

#2

Write a Custom AI Code Review Prompt

Write down a command for code review together with your team. Make sure everyone contributes. Add the file to the repository.

#3

Add AI Code Review to Your CI/CD Pipeline

Add it to the CI/CD pipeline and start using it. Update the code review prompt as you go and learn more.
